

The ultimate in secure and legally compliant IT disposal

The most comprehensive of our three core solutions, **Secure Premium** provides complete peace of mind when disposing of redundant IT assets, negating potential litigation and the highly damaging PR impact of sensitive data entering the public domain.

In a world where data security in general has never had more significance, electronic data, unseen and often unaccountable, sits like a time bomb on redundant technology even after many in-house erasure or formatting processes.

Secure Premium provides you with a fully managed IT disposal service. Every aspect of your disposal is looked after by our dedicated team to ensure everything from collection, to final reporting and certification is cared for.

Secure disposal

Our specialist logistics team will collect your loose IT equipment, palletise and return it to our head office for processing. Every asset will then be registered and uniquely bar coded to provide complete traceability.

Each asset will be tested and graded and all electronic data will be purged or eradicated to approved government standards to ensure no sensitive data enters the public domain.

Unlocking value from redundant equipment

One of the key benefits that separates Secure Premium from our other disposal services is that it can help you to earn money from your old equipment.

If any of your equipment that can be remarketed will be sold via our multi channel sales team. Revenue received will be distributed on a profit share basis to either offset service charges or provide a return on technology investment.

Of course, all of this happens once all the sensitive information has been purged, providing assurance that your confidential data does not fall into the wrong hands.

Environmental disposal

Reporting includes asset level detail to audit standard and transparent analysis of the processing undertaken for each item. Each report will be backed up by a **Certificate of Data Eradication** and **Certificate of Environmental Disposal**. All data eradication is backed by **£1M of Professional Indemnity Insurance**.

Customers who purchase the Secure Premium service can also benefit from our Data Archiving service, where the contents of each PC or Server are burned to DVD before recycling takes place.

Further information

Do not delay - you can book your waste collection using our online calculator at www.WEEEdisposeofIT.com or call **0845 124 5245** and let Egton take care of your equipment disposal.
